12 for 70¢; 100 for $5.00.

Mariposa Tulips

(Calochortus)

(Shown in color on second cover.)

"Mariposa" means **butterfly** in Spanish, and is applied to these Tulips because the "eyes" and markings on the gorgeously colored flowers are so much like those on the wings of a butterfly. Flowers are cup-shaped and of wonderful colors, many marked with dots and pencilings. They are borne one or more to a stem during May and June. Bulbs are small and should be planted 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections give bed a surface covering of several inches of straw or strawy manure after the ground has become frozen.

9382 Clavatus The bowl-shaped blooms, often over 4 in. across, are deep golden yellow without markings, the lower half being covered with stiff yellow hairs. The largest flowered, stoutest stemmed Mariposa Tulip.
3 for 40¢; 12 for $1.40; 100 for $10.00.

9384 Luteus Lemon-yellow to cream and white; finely penciled.

9386 Splendens Clear, unspotted lavender; one of the prettiest.

9388 Venustus Lilac to purple; all are marked, penciled, and spotted.

24 Bulbs (6 each of the above 4 separate varieties, value $1.90) for only **$1.50**

Ixias (African Corn Lily)

9091 Mixed Colors Beautiful little plants of easy culture, about 1 ft. high. Long, slender, graceful spikes of blooms in shades of yellow, white, pink, scarlet and crimson, the center always differing in color from the outer parts. Plant bulbs 3 in. deep, 4 to 6 in. apart, and in cold sections provide winter protection. Not recommended for outdoor culture in very cold sections. Fine for indoor pot-growing.
12 for 45¢; 100 for $3.00.

Globe Tulips

(Calochortus)

Often referred to as Fairy Lanterns; the shape of the flowers and the way they hang on the stem suggest the name. Plants are much branched and bear a number of exquisitely tinted flowers on long, leaf-wrapped stems. Globe Tulips are natives of woodlands, so should be planted in any friable soil mixed with plenty of leaf mold. They like some shade but not full shade. Fine subjects to naturalize in the rock garden or in shaded woods. Plant bulbs 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections, provide winter protection after ground has become frozen. Bloom in May and June.

9376 Albus White with some bronze and pinkish tingeing. 18 to 30 in.

9377 Amabilis Bright canary yellow, a popular color. Up to 15 in. high.

9378 Amoenus A delightful shade of soft rose-pink. 8 to 16 in.

Dog's Tooth Violet
(Erythronium)

(Shown in color on second cover.)

9089 Mixed, All Sorts Beautiful little plants, 6 to 7 in. high, with small, Lily-like, nodding flowers in delicate tints of white, pink, cream, lavender, bright yellow and rose. Leaves are often prettily mottled. The shape of the roots gives them the common name of *Dog's Tooth Violets*, while the mottling of some leaves gives them also the name of *Trout Lilies*. Particularly suited for woodlands, shaded corners or crevices of the rock garden. Bloom in April. Plant bulbs upright as soon as received, 3 in. apart and 2 to 3 in. deep. Do best in well-drained, loamy or gritty soil, moist and rich in leaf-mold. Provide a covering of 4 to 6 inches of half-rotted leaves after bulbs are planted. Sure to be admired.
3 for 25¢; 12 for 75¢; 100 for $5.25.

Snowflakes (Leucojum)
3 for 25¢; 12 for 70¢.

Snowflakes
(Leucojum aestivum)

(Shown in color on second cover.)

9498 Showy, dainty white, bell-shaped, pendent flowers attractively tipped with green; somewhat like a mammoth Snowdrop, on long, slender stems 12 to 14 in. high. Begin blooming in early May; excellent for naturalizing in the mixed border, among shrubbery or in the rock garden. Plant bulbs 4 to 5 in. deep, 6 to 8 in. apart. If planted where bulbs can be left undisturbed for many years, they will increase into large clumps which become more beautiful each spring. May be used for cutting. They do best in a deep, rich, moderately moist soil and semi-shade.
3 for 25¢; 12 for 70¢; 100 for $5.00.

Practically all Bulbs listed in this catalog must be planted in the fall. They cannot be had at any other time of the year.

Camassia Leichtlini
3 for 30¢; 12 for $1.00.

Camassia
(Indian Lily)

9381 Leichtlini Do well under ordinary garden culture. Excellent for naturalizing in open, moist locations. May be left undisturbed for years. Hardy without protection. Blooms in late May and June. The flower-spikes grow 2 to 3 ft. high, and bear many star-shaped flowers 1½ in. across, in shades of blue, ranging from lavender-blue to deep purplish blue. Plant bulbs in masses, 4 in. deep and 4 to 5 in. apart, for best effect.
3 for 30¢; 12 for $1.00; 100 for $7.50.

Ranunculus

8977 Tecolote Giants The largest and most magnificent strain ever offered. Giant double and semi-double flowers, 3 in. and more across, are freely borne on strong stems, 12 to 15 in. long. Our mixture contains a wonderful range of colors—yellows, from straw through all shades to deep golden yellow; reds, including dark crimson, scarlet, orange-red and all other shades of red; orange, pink, many ringed and tipped with a deeper color—in fact, every desired color is included. Do best in a shady location and in moderately rich soil. Fine for cutting. Not reliably hardy north of Washington, D. C., except in warm, sheltered locations. Splendid for growing in frames or pots. The roots resemble tiny clumps of Dahlias. Set them, claws downward, 2 in. deep and 4 to 6 in. apart. If grown in pots, plant 6 to 8 roots in a 6-inch pot; cover roots with one inch of soil, and allow 2 inches of space between the bulbs. **3 for 15¢; 12 for 55¢; 100 for $3.75.**

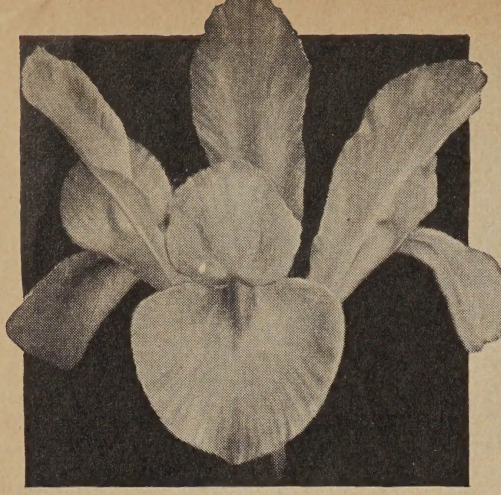
Ranunculus, Tecolote Giants
(Shown in color on second cover.)
3 for 15¢; 12 for 55¢; 100 for $3.75.

In northern states, or in any cold section, we advise waiting until spring to plant Ranunculus and Anemone bulbs outdoors.

Brodiaea

Brodiaea, Mixed Colors
3 for 25¢; 12 for 70¢; 100 for $4.75.

9497 Mixed Colors Neat plants with grassy basal leaves from which arise very slender stems bearing heads of showy little star-shaped waxy blooms in yellow, white, blue, lilac and purple. Grow 15 to 20 in. high and bloom during May and June. Easily grown in almost any soil, but prefer one that is light and porous, well drained and of a sandy or loamy nature. They delight in semi-shade and are lovely for the rock garden and do well under oak and deciduous trees. Plant bulbs 2 to 3 in. deep and protect in cold sections with several inches of straw or strawy manure after the ground has become frozen. May also be grown indoors in pots. **3 for 25¢; 12 for 70¢; 100 for $4.75.**



BULBOUS IRIS

A glorious display of blue, white, bronze, and yellow flowers in June if you plant the bulbs of these beautiful Iris early in the fall. Flowers are suggestive of Orchids. Bulbs, for best results, should be planted early (September or October) in well-drained, sandy loam, 3 to 4 in. deep and 6 in. apart. In cold climates, mulch ground well after it is frozen. It is their nature to root early and often make top growth in December.

Dutch Iris Flowers are larger, broader, and the falls usually wider apart than the Spanish type; they come into bloom one to two weeks earlier. Beautiful in the garden; lovely for cutting. Valuable for greenhouse forcing.

8572 **Blue Horizon** (S. de Vlieger) Standards violet-blue; falls soft sky-blue. **3 for 25¢; 12 for 75¢; 100 for $5.50.**

Single Early Tulips

For a gorgeous display in formal beds or garden borders Single Early Tulips are indispensable. They will bloom, depending on the season, in April and early May, preceding the taller stemmed Triumph, Darwin, Breeder and Cottage types, and thereby lengthening the flowering season. Flowers are large and come in a wide range of beautiful colors. Plants grow 10 to 15 in. high.

Giant Triumph Tulips

A rather new group of Tulips with large, well-formed, Darwin-like flowers on tall, strong stems. They come into bloom between the Single Earlies and the Darwins, thereby providing a continuous display of Tulips in the garden. How to Grow Tulips

Tulips should not be planted in soil in which they had been grown the last two seasons. Select a new location. The soil should be well drained and the position a sunny one. Do not use fresh manure at planting time; well-rotted manure or bone meal may be worked into the soil. Plant bulbs 5 to 6 in. deep and 6 to 8 in. apart. Complete cultural directions are printed on every package of bulbs.

Tall Giant Darwin Tulips

The chief characteristics of Darwin Tulips are the perfect cup-shaped flowers, fleshy petals, tall stems, and lovely colors —scarlet, crimson, rose, pink, violet, purple, slaty blues, blue-violet, lavender, white and golden yellow. They are wonderful for planting in masses in beds or borders, in clumps of 12 or more here and there in the hardy perennial border or in the foreground of shrubbery, and what could be lovelier for cutting?

For a full range of colors in late Tulips, the Darwin, Breeder and Cottage varieties should be included in your plantings, as each class has its own range of colors, and all three bloom at approximately the same time. The Early Single and Triumph Tulips, listed on page 5, bloom earlier than the Darwins or other late Tulips and thus prolong the flowering season. The height given for each variety is average, and some variation is natural in different localities and seasons.

Cottage or May Flowering Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Giant Triumphs have passed, hence the name, "May Flowering." The term "Cottage" is of recent origin, and so called because so many were planted around the country homes and cottages of England. As a class, they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips. Planting directions are printed on every bag.

Cottage Tulips are as varied in their range of colorings as the Darwins but different in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors.

Heights given with each variety are average and may change somewhat according to locality and season.

Giant Breeder Tulips

Breeder Tulips are of the same tall, stately growth as the Darwins, require the same culture, bloom at about the same time (during the month of May), but come in colors not found in that or any other class of tulips. Their rich and unusual blendings of purple and old gold, bronze and terra-cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet-scented. All are splendid for cutting and should be included in every garden display. They begin to flower when the Giant Triumph Tulips are going off. Heights given for each variety are average; they may vary in different localities and seasons.

Narcissus or Daffodils

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus, the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the Giant Trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically these smaller or medium trumpet Daffodils are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types. To avoid confusion, we are listing all of these classes as Daffodils.

Some gardeners apply the name Jonquil to the Giant Trumpet Daffodils, but this is misleading, as Jonquils are small flowered, sweet scented, have foliage of about the same thickness as width (rush-leaved), while all other Daffodils have flat or grass-like leaves. We are offering Jonquils and their hybrids as such and not as Daffodils.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden. Plant as many as you can early this fall and enjoy their showy blooms next spring and for many years thereafter.

As Daffodils bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses, in beds or borders, in groups of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Daffodils are also ideal, easily grown subjects for winter blooming in the house, especially the "Paper White Narcissus."

Short cultural directions for the growing of Daffodils indoors and outdoors are given on the opposite page; full directions are printed on every bag containing the bulbs.

Giant Yellow Trumpet Daffodils

Flowers of the ever-popular Giant or, perhaps better named, Long Trumpet Daffodils, have trumpets as long as, or longer than, the length of the perianth petals. The flowers are freely borne on strong, stiff stems, 1 ft. or more high.

We offer below those varieties which have yellow, lemon or sulphur-colored trumpets and perianths of the same shade or lighter, but not white. ***The trumpet is the funnel-like center; the perianth, the surrounding row of petals.***

How to Grow Daffodils

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot, barely cover the bulbs with soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

Medium Trumpet Daffodils

Burpee's Bulbs are Guaranteed

On this and the next page we offer a choice assortment of Daffodils whose trumpets are not so long as the perianth segments. In this group, where the trumpet is greatly reduced in size and cupped, we refer to it as a "cup"; where trumpet is shortened but expanded or broadened, we call it a "crown."

The Medium Trumpet class is divided into three groups—Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group.

Nobility

12 for **$1.25.**

Barrii Daffodils

In this group, the cup or crown measures less than one-third the length of the perianth segments. For this reason they are often referred to as "Short-cupped Daffodils." They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow, red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, delightfully scented, and usually borne in clusters of two or more on strong stems. Foliage is erect and rush-like, being about the same thickness as width; other Daffodils have flat or grass-like leaves. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

9479 Single Jonquil (*Shown in color on third cover.*) The true, delightfully scented Jonquil with the fragrance of the honey locust. Each stem carries a cluster of 3 to 8 rich golden flowers. A gem for any garden; invaluable for cutting. **3 for 25¢; 12 for 85¢; 100 for $6.00.**

9565 Tullus Hostilius New type of Jonquil hybrid; flowers as large as some of the smaller sized trumpet Daffodils. An ideal variety for garden display, house culture or cut-flower use.
18¢ each; 3 for 45¢; 12 for $1.50; 100 for $10.50.

9483 Golden Sceptre One of the finest of the new Jonquil hybrids. Flowers are deep Jonquil-yellow, 3 in. or so across. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. Ideal for garden and cutting.
3 for 30¢; 12 for 90¢; 100 for $6.75.

9468 Giganteus Campernelle The largest flowering of all Campernelles. The deep yellow, fragrant flowers are borne freely in clusters of impressive size. Early blooming and a favorite for all purposes. Long keeping qualities. **3 for 35¢; 12 for $1.15; 100 for $8.00.**

Paper White Narcissus
12 for **60¢**; **100** for **$4.25.**

Polyanthus Narcissus

The popular flower for growing in the house during the winter and early spring, either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after October 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place.

Polyanthus Narcissus may also be grown in soil. **They are not suited to garden planting** except in frostless localities.

9460 Paper White Grandiflora
The Fragrant White Narcissus

The large, pure white blooms are borne in clusters and are highly prized for their beauty, fragrance, and the ease with which they can be grown. This accounts for their universal popularity. (*Shown in color on second cover.*)

Hardy Garden Lilies

Easy to grow in any good, well-drained garden loam to which has been added a generous quantity of leaf mold. Once established, they will increase in beauty each year. All varieties offered are highly decorative in the border, while the dwarfer ones also give a charming touch of beauty to the rock garden. Lily bulbs differ greatly in size according to variety, some 1 in. across, others 3 in. or more; we supply the sizes which will give the best results. We do not recommend Hardy Lily bulbs for house culture.

Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60°. Ideal garden subjects in frost-free locations.

Pansies and Forget-me-nots

For early spring display, the two most popular flowers grown from seed are Pansies and Forget-me-nots. These are often referred to as "cool-weather plants" because they produce their largest and most colorful blooms during the cooler seasons of the year—particularly in the early spring. Sow seeds in July or August, early enough so that the seedlings, transplanted in the fall, will reach an almost ready-to-bloom stage before winter sets in. Carry the plants over winter in frames or outdoors, depending on the locality in which you live.

Burpee's Giant Pansies

Pansies always have been a great specialty with us and we are justly proud of the quality and trueness to type of our strains. Pansies succeed best in rich, well-drained soil in a sunny position. Keep flowers picked during the summer, plants pinched back, and you will get a nice lot of flowers again in the fall. For full cultural directions, ask for a free copy of the Burpee leaflet No. 24A.

Burpee's Annual Flower Seeds for Fall Sowing

Many annuals produce earlier and better blooms if seed is sown outdoors in late fall after the first light frosts. Our tests prove early November, in the locality of Philadelphia, is the best time. Seed sown then will lay dormant in the soil until spring, when it will germinate and begin growing long before you could sow outdoors at that time of the year. We have selected the varieties best adapted for fall sowing, which must not be done too early.

Burpee's Giant Sweet Peas

for Fall Sowing

Sweet Pea seeds sown in the fall bloom earlier and more freely than if sown in the spring. Sow the seed as late in the fall as possible so that it may just germinate previous to frost, thereafter lying dormant all winter, ready to begin growth the first mild days of spring. In this locality (Philadelphia) sow in November and early December; further north, the middle of October, and in the south sow in late September and early October. An ounce will sow about 25 ft. of row.

Early Flowering

Come into bloom 3 to 4 weeks earlier than the Giant Spencer varieties. Especially valuable for growing in frost-free sections and for earliest flowers outdoors in the north; also valuable for winter flowering under glass, for which purpose they are grown by florists in large quantities.

Perennial Flower Seeds

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better—so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag containing the seeds. The Burpee leaflet, "Perennials from Seed," sent **Free** upon request. Heights and blooming season are average; they may vary in different localities.
